

HEALTHeLINK™

Health Home Community Meeting
December 16, 2011

What We Are...

Delivering Clinical Data to the Point of Care

Connectivity Functionality

Some of what we enable (or will enable upon completion of current projects):

- Connect participants to HEALTHeLINK for receiving labs, radiology reports and hospitalization reports directly into their EMR
- EMR to EMR - 2 way connections (interoperability) for referral data exchange (Primary Care to Specialists including Behavior Health)
- Enable the ability for treating providers to “pull” data on patients (requires patient consent) to include lab, radiology, transcribed reports, medication history and hospital admission / discharge / transfer (ADT) details
- Deeper use of registries and analytics in medical practices and behavioral health clinics
- An increase in the number of Medical and Behavioral Health providers using electronic medical records
- Connections to NYS DOH for Medicaid, Immunization, Syndromic Surveillance...
- 2 way connection to the VA Hospital System for access to clinical data
- Patient Centered Medical Home (PCMH) facilitation and accreditation assistance – Behavioral Health and Diabetes focus
- Enable providers to subscribe for alerts on selected patients in order to automatically received information on their patients.

Current Status

- **Over 1890 providers and 5600 total users connected to HEALTHeLINK**
 - 357 practices
 - 67% of practices connected have EHR's
 - 112 practices live (8 different EHR vendors connected) for results delivery.
 - 69 practices live (over 500 providers) with EHR to EHR - primary care to specialist interoperability for referrals and transitions of care.
- **Over 55 million Lab / Radiology / Transcribed reports available – 2 million added per month**
 - Approximately 90% of the WNY Lab data
 - Approximately 80% of the WNY Radiology data
- **Over 90% of patients in our geography in the Master Patient Index**
- **Approximately 325,000 patient consents received**
 - 15,000 added per month – 95% affirmative

What We Are Not ...

What Else Is Needed...?

- **HEALTHeLINK does not make available for “pull” purposes data from 42 CFR Part 2 facilities (Alcohol and Substance Abuse clinics) – restrictive disclosure rules**
- **Not certain that the HEALTHeLINK current messaging tools/technologies will effectively support the coordination of Social Services connectivity (Housing Authority, Mission, etc...)**
 - **Need to better understand requirements relative to treatment plans**
- **Consent / Patient Registration in Health Home clarity**
- **Since I don't know what I don't know... anything else required for effective Health Home connectivity is in question.**

Thank You!
